- 2. Sending Money to the wrong place
- 3. Hacking / Data Loss
- 4. Chargeback& Fraud
- 5. Lack of Execution / Making Poor Decisions

ACH Fraud Transaction Detection

Currently, ACH Originators of
WEB debit entries are required to use a
"commercially reasonable fraudulent transaction
detection system" to screen WEB debits for fraud.
This existing screening requirement will be
supplemented to make it explicit that "account
validation" is part of a "commercially reasonable
fraudulent transaction detection system." The
supplemental requirement applies to the first
use of an account number, or changes to the
account number.

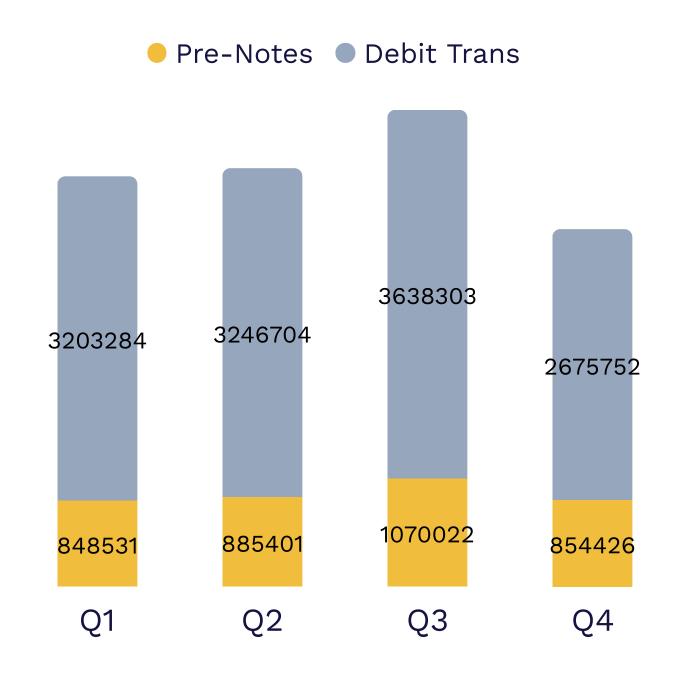

THIS RULE MODIFIES

THE FOLLOWING AREAS OF THE NACHA OPERATING RULES:

Article Two, Subsection 2.5.17.4 (Additional ODFI Warranties for Debit WEB Entries) to make explicit that a fraudulent transaction detection system must, at a minimum, validate the account to be debited.
